

## Eliaden 2010

With even greater success than in 2008 the organizers of the fair as well as Stork AS, Insta sales partner in Norway, have finished »Eliaden 2010«.

The high-quality Insta products got a lot of positive response from the expert audience. 340 people visited the 120 m<sup>2</sup> stand on the fair grounds Norges Varemesse in Lillestrøm. In addition to the well-known solution for luminous surfaces instalight® 2022, the demanding audience were presented the new spots instalight® 1065/3065. The hand rail system and the complete system of linear plane and punctual LEDLUX lamps with all its versions convinced the visitors.

After these successful talks Frank Johansen and his colleagues of Stork AS are very satisfied and are looking forward to future projects with LED luminaires from Insta.
