About Insta

Insta GmbH is an electronics specialist based in Lüdenscheid in North Rhine-Westphalia. The company is a research, development and manufacturing centre for digital networking in building technology - and a think tank for the future of building automation. With around 500 employees, Insta GmbH generates around 75 million euros in sales with products and OEM components: from dimmers for LED lights to solutions for the Internet of Things (IoT). Insta has been a specialist in building and lighting automation for over 50 years. As a co-founder of the KNX Association, Insta understands the importance of uniform standards to ensure the smooth interconnection of the various components in home and building automation. Insta was founded in 1970 as a technology-driven joint venture of German socket outlet and switch manufacturers - to this day, Gira Giersiepen GmbH & Co. KG (Radevormwald) and Albrecht Jung GmbH & Co. KG (Schalksmühle) are each half shareholders in the company.
