

Fig. 1: Plug & Light canopy with Plug & Light light socket with bayonet

## Plug & Light canopy

The Plug & Light canopy was developed for ceiling mounting of Plug & Light light sockets. Quickly mounted at the ceiling, the canopy takes up the Plug & Light flush-mounted insert and the cables of the electrical connection. If surface-mounted cables are to be inserted from the side, cable entries can be opened in the shadow gap. The Plug & Light cover with bayonet, designed for the canopy, adapts itself to the design of the canopy in a form-fit manner and is mounted by means of a central screw.

### Product features

- › For ceiling mounting of the Plug & Light light socket with bayonet
- › Easy mounting at the ceiling with two screws (scope of supply)
- › Easy mounting of the Plug & Light flush-mounted insert with 2 screws into the canopy
- › Introduction of the mains cable from above or laterally through the shadow gap
- › Suitable to take up Plug & Light lighting attachments with a weight of up to 1.5 kg
- › Housing available in all standard colours
